

PERFECT PERGOLAS®

Bringing the outdoors inside

THE PERGOLA POTENTIAL!

We may be out of recession, but it will be some time before confidence to the housing market returns and **Perfect Pergolas** garden structures are an ideal way to enhance a property's attractiveness and increase its practicality. By helping to beat the squeeze on family living space, a beautiful 'lean-to' pergola will not only increase the size of living area but also boost the property value, enabling customers to make the most of their largest investment – namely their home.

Unlike many outdoor structures there are very few planning restrictions so it is an easy and cost effective way to add extra space to the home. In tough times people want to make the best of the homes and gardens they have, without the expense of moving. "Just because the banks aren't lending doesn't mean your family will stop growing", says Adrian Valentine, managing director of Perfect Pergolas. "A pergola offers a really simple way to create additional living and eating areas for the warmer spring and summer months – plus it gets everyone outside."

Perfect Pergolas suggest a range of plants on the website that can be bought to grow around the pergola making it an adaptable and changing feature through the seasons.

Perfect Pergolas only use timber from sustainable sources and offer a 10 year guarantee. Ordering is simple and straight forward and can be done direct via the website with guaranteed delivery within five days along with instructions. Prices start at just £299 for a basic pergola (incl: delivery).
